

Campbell Mayor Nicholas Phillips

Dear Friends:

DID YOU SEE IT? I SURE DID! In 2015 this entire City set it's focus on a Dunkin Donuts, we prayed, we hoped, we envisioned and in 2020 we saw it come to pass! Make no mistake, our beautiful Campbell Dunkin and the continuing transformation and beautification of our 422 Corridor, the clean up of blight and beautification city-wide of property, infrastructure, Roosevelt Park and private residences over the years is as much miraculous answer to prayer as it is hard work and effort! Our residents prayerfully supported the Education Board and we saw completion of the Rec Center, Stem Program, and Library! It takes a village, and our schools and businesses take pride in their establishments, our citizens take pride in their property, and everyone prayerfully and financially puts Campbell first to raise up and support each other. It is a great accomplishment and you have as much to be proud of as I do; but we need to stay focused!

I believe our willingness to seek help from God, each other, and our commitment to achieve greatness will allow us to continue moving in the right direction! Others are taking notice! Southwoods brought us doctor's offices and an Urgent Care; Property values are rising as people are looking to make Campbell their forever home; and, More businesses have joined our fair City: The Polished Gents, DJ's Hot Dog Shop, and Tavern 26 on 12th Street, just to name a few. There is much to be excited about; We must keep pressing forward!

I believe we have only scratched the surface God's Blessings for us; there is more to come! We still have properties that need tending, especially in 1st Ward, where government red tape is preventing us from taking down the company houses and turning that into green space, but I will continue to press forward in that regard. As Roosevelt Park is beginning to transform, I am looking forward to beautify and transform Jackson Park. My greatest vision, to eliminate the cable monopoly and allow residents to take control of their technology! I am currently meeting with companies and engineers to have fiber-optic cable run city wide; available to every resident and business! I am working forward to putting the Fiber-Optic Project on a future ballot to allow this project to be Public Owned Technology! Let's take back our City from the Tech Giants! We can Run the Cable and Own the Cable as a City, and the internet providers can compete for our business while they rent our lines from us! Get Excited Campbell! Vote to Re-Elect Nick Phillips in 2021 and Together We Will Press Forward! Together We Will Achieve Greatness! Campbell is more than just Our City; Campbell is Our Forever Home.

Your Friend and Mayor,

Nick Phillips
